

OUR VISION

To be a **World-Class Supplier** of Energy and Network Services, **focused** on **Customer Service** and **Value Creation**.

Company Profile

WEL Networks is the fifth largest electricity network company in New Zealand, with over 74,000 connections in the Waikato.

The physical network of lines, poles, cables, transformers and substations that deliver electricity safely and reliably is managed, maintained and developed by WEL Networks. WEL Networks is focused on delivering an increasingly reliable supply together with competitive prices.

WEL Networks has a total system length of 4,742 km, represented by 3,366 km of overhead lines and 1,376 km of underground lines. Over the past year the length of the underground system has increased by 50 km, a sign of our commitment to the environment and community wishes.

Chaired by Sir Dryden Spring, WEL's professional Board of Directors represent both local interests and bring substantial business acumen and apply high standards of corporate governance.

WEL Networks is 100% owned by a community trust, the WEL Energy Trust. Each year the Company returns a substantial portion of its profit to the Trust to enable them to distribute funding to support local organisations and initiatives.
