Templates for Schedules 1–10
Template Version 3.0. Prepared 14 April 2014

### **TABLE OF CONTENTS**

SCHEDULE 1:	ANALYTICAL RATIOS	3
SCHEDULE 2:	REPORT ON RETURN ON INVESTMENT	4
SCHEDULE 3:	REGULATORY PROFIT	6
SCHEDULE 4:	REGULATORY ASSET BASE VALUE (ROLLED FORWARD)	8
SCHEDULE 5A:	REPORT ON REGULATORY TAX ALLOWANCE	11
SCHEDULE 5B:	REPORT ON RELATED PARTY TRANSACTIONS	13
SCHEDULE 5C:	TCSD ALLOWANCE	14
SCHEDULE 5D:	REPORT ON COST ALLOCATIONS	15
SCHEDULE 5E:	REPORT ON ASSET ALLOCATIONS	16
SCHEDULE 6A:	REPORT ON CAPITAL EXPENDITURE FOR THE DISCLOSURE YEAR	17
SCHEDULE 6B:	REPORT ON OPERATIONAL EXPENDITURE FOR THE DISCLOSURE YEAR	19
SCHEDULE 7:	COMPARISON OF FORECASTS TO ACTUAL EXPENDITURE	20
SCHEDULE 8:	REPORT ON BILLED QUANTITIES AND LINE CHARGE REVENUES	21
SCHEDULE 9A:	ASSET REGISTER	22
SCHEDULE 9B:	ASSET AGE PROFILE	23
SCHEDULE 9C:	OVERHEAD LINES	24
SCHEDULE 9D:	REPORT ON EMBEDDED NETWORKS	25
SCHEDULE 9E:	REPORT ON NETWORK DEMAND	26
SCHEDULE 10:	REPORT ON NETWORK RELIABILITY	27
SCHEDULE 11A:	REPORT ON FORECAST CAPITAL EXPENDITURE	28
SCHEDULE 11B:	REPORT ON FORECAST OPERATIONAL EXPENDITURE	32
SCHEDULE 12A:	REPORT ON ASSET CONDITION	33
SCHEDULE 12B:	REPORT ON FORECAST CAPACITY	34
SCHEDULE 12C:	DEMAND FORECAST	35
SCHEDULE 12D:	REPORT FORECAST INTERRUPTIONS AND DURATION	36
SCHEDULE 14:	MANDATORY EXPLANATORY NOTES	37
SCHEDULE 14A:	MANDATORY EXPLANATORY NOTES ON FORECAST INFORMATION	46
SCHEDULE 15:	VOLUNTARY EXPLANATORY NOTES	47

## **SCHEDULE 1: ANALYTICAL RATIOS**

			Company Name	W	/EL Networks Lir	mited
			For Year Ended		31 March 201	.4
Thi be	CHEDULE 1: ANALYTICAL RATIOS s schedule calculates expenditure, revenue and service ratios from the inform nterpreted with care. The Commerce Commission will publish a summary and closed in accordance with this and other schedules, and information disclose	analysis of information	disclosed in accord	ance with the ID det		
sch re	f					
7	1(i): Expenditure metrics					
8		Expenditure per GWh energy delivered to ICPs (\$/GWh)	Expenditure per average no. of ICPs (\$/ICP)	Expenditure per MW maximum coincident system demand (\$/MW)	Expenditure per km circuit length (\$/km)	Expenditure per MVA of capacity from EDB- owned distribution transformers (\$/MVA)
9	Operational expenditure	15,750	220	65,958	3,610	23,444
10	Network	6,868	96	28,763	1,574	10,223
11	Non-network	8,882	124	37,195	2,036	13,221
12						
13	Expenditure on assets	42,475	595	177,881	9,735	63,225
14	Network	39,379	551	164,915	9,025	58,617
15 16	Non-network	3,096	43	12,966	710	4,609
18 19 20 21 22	Total consumer line charge revenue Standard consumer line charge revenue Non-standard consumer line charge revenue	Revenue per GWh energy delivered to ICPs (\$/GWh) 77,088 78,089 36,694	Revenue per average no. of ICPs (\$/ICP) 1,079 1,067 177,683			
23 24	1(iii): Service intensity measures					
25	Demand density	55	Maximum coincide	nt system demand pe	er km circuit length (fo	or supply) (kW/km)
26	Volume density	229	Total energy delive	red to ICPs per km cir	cuit length (for suppl	y) (MWh/km)
27	Connection point density	16	Average number of	FICPs per km circuit le	ength (for supply) (ICI	Ps/km)
28	Energy intensity	13,999	Total energy delive	red to ICPs per Avera	ge number of ICPs (k	Wh/ICP)
29						
30 31	1(iv): Composition of regulatory income					
32	I(IV). Composition of regulatory income	(\$000)	% of revenue			
33	Operational expenditure	18,919	19.71%			
34	Pass-through and recoverable costs	27,103	28.24%			
35	Total depreciation	19,645	20.47%			
36	Total revaluation	6,999	7.29%			
37	Regulatory tax allowance	6,985	7.28%			
38	Regulatory profit/loss	30,328	31.60%			
39	Total regulatory income	95,981				
40 41	1(v): Reliability					
42		Interruptions per 100 circuit km				
43	Interruption rate	18.98				

## SCHEDULE 2: REPORT ON RETURN ON INVESTMENT

	Company Name	WEL	Networks Limit	ed						
	For Year Ended		1 March 2014							
SC	HEDULE 2: REPORT ON RETURN ON INVESTMENT									
This base EDBs	This schedule requires information on the Return on Investment (ROI) for the EDB relative to the Commerce Commission's estimates of post tax WACC and vanilla WACC. EDBs must calculate their ROI based on a monthly basis if required by clause 2.3.3 of the ID Determination or if they elect to. If an EDB makes this election, information supporting this calculation must be provided in 2(iii). EDBs must provide explanatory comment on their ROI in Schedule 14 (Mandatory Explanatory Notes).  This information is part of audited disclosure information (as defined in section 1.4 of the ID determination), and so is subject to the assurance report required by section 2.8.

#### SCHEDULE 6A: REPORT ON CAPITAL EXPENDITURE FOR THE DISCLOSURE YEAR

**WEL Networks Limited** Company Name 31 March 2014 For Year Ended SCHEDULE 6a: REPORT ON CAPITAL EXPENDITURE FOR THE DISCLOSURE YEAR This schedule requires a breakdown of capital expenditure on assets incurred in the disclosure year, including any assets in respect of which capital contributions are received, but excluding assets that are vested assets. Information on expenditure on assets must be provided on an accounting accruals basis and must exclude finance costs. EDBs must provide explanatory comment on their expenditure on assets in Schedule 14 (Explanatory Notes to Templates). This information is part of audited disclosure information (as defined in section 1.4 of the ID determination), and so is subject to the assurance report required by section 2.8. 6a(i): Expenditure on Assets (\$000) (\$000) Consumer connection 11,801 System growth 14,459 10 Asset replacement and renewal 12,927 11 Asset relocations 3.881 12 Reliability, safety and environment: 13 Quality of supply Legislative and regulatory 15 Other reliability, safety and environment Total reliability, safety and environment 4,235 17 **Expenditure on network assets** 18 Non-network assets 19 51,023 20 **Expenditure on assets** plus 21 Cost of financing 22 Value of capital contributions 5,703 23 Value of vested assets 24 45,492 6a(ii): Subcomponents of Expenditure on Assets (where known) (\$000) 27 Energy efficiency and demand side management, reduction of energy losses 28 Overhead to underground conversion 29 Research and development 6a(iii): Consumer Connection 30 31 onsumer types defined by EDB\* (\$000) (\$000) Residential (1153) 7,071 33 ow Voltage Low Energy (400V) (1361) 35 w Voltage High Energy (400V) (1360) m Voltage (11kV) (1354) 36 High Voltage (33kV) (1357 rcial - Asset Specifi \* include additional rows if needed 38 39 11,801 Capital contributions funding consumer connection expenditure 3,031 41 Consumer connection less capital contributions 8,770 6a(iv): System Growth and Asset Replacement and Renewal Asset Replacement System Growth and Renewal 44 (\$000) (\$000) 45 Subtransmission 1.840 Distribution and LV lines 908 8,519 48 Distribution and LV cables 375 224 231 49 Distribution substations and transformers 1,062 50 Distribution switchgear 1.170 Other network assets 7,961 744 51 52 System growth and asset replacement and renewal expenditure 14.459 12.927 53 Capital contributions funding system growth and asset replacement and renewal 54 System growth and asset replacement and renewal less capital contributions 14.219 12.653 55 56 6a(v): Asset Relocations Project or programme\* (\$000) (\$000) 58 2,025 H39a Te Kowhai / Limmer Road Widening 59 60 Undergrounding 61 62 63 \* include additional rows if needed All other asset relocations projects or programmes 65 Asset relocations expenditure Capital contributions funding asset relocations 2,153 66 less 67 Asset relocations less capital contributions

#### SCHEDULE 6B: REPORT ON OPERATIONAL EXPENDITURE FOR THE DISCLOSURE YEAR

Company Name WEL Networks Limited
For Year Ended 31 March 2014

## SCHEDULE 6b: REPORT ON OPERATIONAL EXPENDITURE FOR THE DISCLOSURE YEAR

This schedule requires a breakdown of operating expenditure incurred in the disclosure year.

EDBs must provide explanatory comment on their operational expenditure in Schedule 14 (Explanatory notes to templates). This includes explanatory comment on any atypical operating expenditure and assets replaced or renewed as part of asset replacement and renewal operational expenditure, and additional information on insurance.

This information is part of audited disclosure information (as defined in section 1.4 of the ID determination), and so is subject to the assurance report required by section 2.8.

sch re	f

Company Name **WEL Networks Limited** AMP Planning Period 1 April 2014 – 31 March 2024

## **SCHEDULE 11a: REPORT ON FORECAST CAPITAL EXPENDITURE**

This schedule requires a breakdown of forecast expenditure on assets for the current disclosure year and a 10 year planning period. The forecast is to be expressed in both constant price and nominal dollar terms. Also required is a forecast of the value of commissioned assets (i.e., the value of RAB additions)

EDBs must provide explanatory comment on the difference between constant price and nominal dollar forecasts of expenditure on assets in Schedule 14a (Mandatory Explanatory Notes).

	nformation is not part of audited disclosure information.

AMP Planning Period 1 April 2014 – 31 March 2024

## SCHEDULE 11b: REPORT ON FORECAST OPERATIONAL EXPENDITURE

This schedule requires a breakdown of forecast operational expenditure for the disclosure year and a 10 year planning period. The forecasts should be consistent with the supporting information set out in the AMP. The forecast is to be expressed in both constant price and nominal dollar terms. EDBs must provide explanatory comment on the difference between constant price and nominal dollar operational expenditure forecasts in Schedule 14a (Mandatory Explanatory Notes).

ED	is scriedule requires a breakdown of forecast operational expenditure for the disclosure year a DBs must provide explanatory comment on the difference between constant price and nominal do his information is not part of audited disclosure information.							ousers to se express

## **SCHEDULE 12b: REPORT ON FORECAST CAPACITY**

This schedule requires a breakdown of current and forecast capacity and utilisation for each zone substation and current distribution transformer capacity. The data provided should be consistent with the information provided in the AMP. Information provided in this table should relate to the operation of the network in its normal steady state configuration.

## SCHEDULE 12d: REPORT FORECAST INTERRUPTIONS AND DURATION

This schedule requires a forecast of SAIFI and SAIDI for disclosure and a 5 year planning period. The forecasts should be consistent with the supporting information set out in the AMP as well as the assumed impact of planned and unplanned SAIFI and SAIDI on the expenditures forecast provided in Schedule 11a and Schedule 11b.

#### **SCHEDULE 14: MANDATORY EXPLANATORY NOTES**

(In this Schedule, clause references are to the Electricity Distribution Information Disclosure Determination 2012)

- 1. This Schedule requires EDBs to provide explanatory notes to information provided in accordance with clauses 2.3.1, 2.4.21, 2.4.22, and 2.5.2.
- 2. This Schedule is mandatory—EDBs must provide the explanatory comment specified below, in accordance with clause 2.7.1. Information provided in boxes 1 to 12 of this schedule is part of the audited disclosure information, and so is subject to the assurance requirements specified in section 2.8.
- 3. Schedule 15 (Voluntary Explanatory Notes to Schedules) provides for EDBs to give additional explanation of disclosed information should they elect to do so.

Return on Investment (Schedule 2)

4. In the box below, comment on return on investment as disclosed in Schedule 2. This comment must include information on reclassified items in accordance with clause 2.7.1(2).

#### Box 1: Explanatory comment on return on investment

The 2012 and 2013 had incorrect tax calculations in schedule 5a. The calculation should have included an adjustment for revaluations as income included in regulatory profit which is not deductible for tax. The ROI disclosed was 6.27% (2012) and 5.23% (2013). The ROI should have been 6.73% (2012) and 5.48% (2013).

Clause 2.3.3 thresholds has been met and therefore we have elected not to publish alternative ROI.

## Regulatory Profit (Schedule 3)

- 5. In the box below, comment on regulatory profit for the disclosure year as disclosed in Schedule 3. This comment must include
  - a description of material items included in 'other regulatory line income' other than gains and losses on asset sales, as disclosed in 3(i) of Schedule 3
  - 5.2 information on reclassified items in accordance with clause 2.7.1(2).

#### Box 2: Explanatory comment on regulatory profit

Transmission rental rebates from Transpower have been reclassified from other regulatory line income to pass-through and recoverable costs. This has been reclassified as Commerce Commission has clarified that the transmission rental rebates are not other regulatory line income and we have therefore determined that the most logical place would be to reduce recoverable costs i.e. net the rebate from Transpower charges.

Gains / (losses) on assets disposed have been calculated using RAB book values. The definition in electricity distribution information disclosure determination indicates that GAAP values should be used. However in a workshop held by Commerce Commission they stated that RAB values should be used. The prior year gains / (losses) on assets disposed were calculated using GAAP.

No other items were reclassified.

The material item included in 'other regulatory line income' is Te Uku windfarm lease revenue. This revenue is for the line and other assets that supply the windfarm.

Merger and acquisition expenses (3(iv) of Schedule 3)

- 6. If the EDB incurred merger and acquisitions expenditure during the disclosure year, provide the following information in the box below-
  - 6.1 information on reclassified items in accordance with clause 2.7.1(2)
  - any other commentary on the benefits of the merger and acquisition expenditure to the EDB.

# **Box 3: Explanatory comment on merger and acquisition expenditure**No merger and acquisition expenditure

Value of the Regulatory Asset Base (Schedule 4)

7. In the box below, comment on the value of the regulatory asset base (rolled forward) in Schedule 4. This comment must include information on reclassified items in accordance with clause 2.7.1(2).

# Box 4: Explanatory comment on the value of the regulatory asset based (rolled forward) No items have been reclassified.

Section 4(vii) The opening RAB for asset categories required last year was not readily available. The opening values were apportioned based on the asset categories available in the company's accounting asset register and therefore were approximate only. During 2014 a specific RAB register was created to cater for the categorisation and unique calculations required for the regulatory accounts. The variance between the opening balance that was disclosed in 2013 and the new RAB register is shown in Asset Category transfers.

Section 4(iv) Roll Forward of Works Under Construction. The works under construction figure is a lot higher than the previous year. This is because the RAB database cannot include assets that were commissioned but not yet capitalised due to not having sufficient detailed information such as standard life and asset categorisation. Assets are capitalised once the project is completed including receiving asbuilt information. The value of assets commissioned but not included in the RAB is \$8.3M. The WIP balance associated with these assets will be rolled out of WIP once these assets are capitalised into the RAB register.

Regulatory tax allowance: disclosure of permanent differences (5a(i) of Schedule 5a)

- 8. In the box below, provide descriptions and workings of the following items, as recorded in the asterisked categories in 5a(i) of Schedule 5a-
  - 8.1 income not included in regulatory profit / (loss) before tax but taxable;
  - 8.2 expenditure or loss in regulatory profit / (loss) before tax but not deductible;
  - 8.3 income included in regulatory profit / (loss) before tax but not taxable;
  - 8.4 expenditure or loss deductible but not in regulatory profit / (loss) before tax.

#### Box 5: Regulatory tax allowance: permanent differences

- 8.1 *Income not included in regulatory profit/(loss) before tax but taxable*: is the current year portion of the Third Party Contribution costs which are being amortised over 10 years.
- 8.2 expenditure or loss in regulatory profit / (loss) before tax but not deductible:
  - non deductible portion of entertainment \$33K
  - legal costs \$0K
  - depreciation on buildings \$302K
- 8.3 income included in regulatory profit / (loss) before tax but not taxable:
  - historical undergrounding costs funded via government grant being amortised over 45 years \$30K
  - revaluations \$6,999K
- 8.4 expenditure or loss deductible but not in regulatory profit / (loss) before tax: no items

Regulatory tax allowance: disclosure of temporary differences (5a(vi) of Schedule 5a)

9. In the box below, provide descriptions and workings of items recorded in the asterisked category 'Tax effect of other temporary differences' in 5a(vi) of Schedule 5a.

# Box 6: Temporary differences / Tax effect of other temporary differences (current disclosure year) Temporary differences relates to :

- Wage related payments not paid within 63 days \$8K
- Impaired assets (\$88K)

Related party transactions: disclosure of related party transactions (Schedule 5b)

10. In the box below, provide descriptions of related party transactions beyond those disclosed on schedule 5b including identification and descriptions as to the nature of directly attributable costs disclosed under clause 2.3.6(1)(b).

#### **Box 7: Related party transactions**

WEL Networks incur costs on behalf of a subsidiary, Waikato Networks Limited. These are oncharged at cost via a management fee.

This is not disclosed as separate items of revenue and expenditure as the net impact is nil.

Cost allocation (Schedule 5d)

11. In the box below, comment on cost allocation as disclosed in Schedule 5d. This comment must include information on reclassified items in accordance with clause 2.7.1(2).

#### **Box 8: Cost allocation**

No items were reclassified.

All costs are considered directly attributable, as under the Input Memorandum (IM) determination we have applied ACAM. The management fee structure with subsidiaries nets out the costs and effectively means the remaining amount is directly attributable.

#### Asset allocation (Schedule 5e)

12. In the box below, comment on asset allocation as disclosed in Schedule 5e. This comment must include information on reclassified items in accordance with clause 2.7.1(2).

#### Box 9: Commentary on asset allocation

No items were reclassified.

Indirectly attributable values relate to poles that have fibre placed on them and the fibre is owned by the local fibre company. The asset values are not detailed enough for an exact calculation so the figures provided are estimated. Where capital contributions have been received for replacement of poles relating to fibre then those poles are not included in the indirectly attributable value as the contribution is netted of the capital cost.

#### Capital Expenditure for the Disclosure Year (Schedule 6a)

- 13. In the box below, comment on capital expenditure for the disclosure year, as disclosed in Schedule 6a. This comment must include
  - a description of the materiality threshold applied to identify material projects and programmes described in Schedule 6a;
  - 13.2 information on reclassified items in accordance with clause 2.7.1(2),

#### Box 10: Explanation of capital expenditure for the disclosure year

WEL classifies a project with total cost over \$0.5M as a major capital project. All capital projects are approved by the WEL Board and progress is reported monthly to the Board. Major capital projects are reported to the Board in a higher level of detail.

No items were reclassified.

## Operational Expenditure for the Disclosure Year (Schedule 6b)

- 14. In the box below, comment on operational expenditure for the disclosure year, as disclosed in Schedule 6b. This comment must include-
  - 14.1 commentary on assets replaced or renewed with asset replacement and renewal operating expenditure, as reported in 6b(i) of Schedule 6b;
  - 14.2 information on reclassified items in accordance with clause 2.7.1(2);

14.3 commentary on any material atypical expenditure included in operational expenditure disclosed in Schedule 6b, a including the value of the expenditure the purpose of the expenditure, and the operational expenditure categories the expenditure relates to.

## Box 11: Explanation of operational expenditure for the disclosure year No items were reclassified.

Asset replacement and renewal operating expenditure is mainly incurred in relation to unplanned defects correction. The expenditure includes the following main assets categories:

- Switchgear including RMU & overhead line switches / sectionisers / voltage regulators
- Conductors, poles and crossarms including insulator, live line clamps, broken cut outs, possum guards and stay wire repairs
- Distribution transformers
- Pillars
- Feeders including stolen earth repairs
- Circuit breakers
- Zone substations including buildings, zone sub transformers, ripple plants and battery charges and banks
- SCADA and other communication devices

There were three atypical events that had a material impact on operational expenditure.

- High replacement costs were incurred to replace stolen earth conductors due to an organised crime group that targeted the copper earthing conductors for scrap.
- High costs to replace failed 33kV transformer terminations at the Horotiu Zone substation
- The storm damage to the network in April and September 2013.

Demand side management costs of \$691K relate to the cost of running the smart grid network.

Variance between forecast and actual expenditure (Schedule 7)

15. In the box below, comment on variance in actual to forecast expenditure for the disclosure year, as reported in Schedule 7. This comment must include information on reclassified items in accordance with clause 2.7.1(2).

#### Box 12: Explanatory comment on variance in actual to forecast expenditure

#### 7(ii) Expenditure on assets

Consumer connection was higher than forecast due to higher actual commercial connections and subdivision development works.

System growth was lower than forecast due to:

- Deferral of smart box project installation (\$7.5M) was mainly due to insufficient resources to implement the original plan.
- Deferral of WHA CB6 WAL CB6 Feeder interconnection project (\$0.45M)
- Carried over several projects from 13/14 into 14/15 financial year (\$2.6M)

Asset replacement and renewal is generally aligned with the forecast. The small amount of overrun is due to more capitalised faults.

Asset relocations were higher than the forecast due to more relocation requests.

Reliability, safety and environment is lower than the forecast mainly due to:

- Legislative and regulatory: Seismic strengthening of the Glasgow zone substation has been rescheduled to 15/16. This was due to increased risk to relocate existing old switchgear and need to allow for future 33Kv switchgear installation in building alterations. This is being reviewed again to allow for different option evaluation.
- Other reliability, safety and environment: Caro Street Switching Station was deferred by the
  customer. We have re-categorised this work to safety driven works to mitigate an identified
  safety risk at the existing Garden Place Switching Station (which Caro Street will replace).

Non-network capex is lower than forecast due to:

- Renovations to the corporate head office and depot did not go ahead \$1.6M.
- Software projects were deferred to the following year. This happened for a number of reasons including business requirements and timing changed and there was not enough resources to complete the programmed work.

#### 7(iii) Operational Expenditure

- Service interruptions and emergencies: Overspend mainly due to storm damage repairs to the network in April and September 2013.
- Vegetation management: Under spend mainly due to planned cutting costs expected under the accelerated inspection program did not occur due to delays caused by difficulties obtaining the necessary land owner consents.
- Routine and corrective maintenance and inspection: Overspend mainly due to the high number and reinstate costs of stolen earths from distribution assets. The thefts were perpetrated by an organised crime group targeting copper theft for scrap value. We also had high unplanned corrective repair costs to the high voltage terminations of the Horotiu Zone

transformers and bus bars at Sandwich Road Substation.

- Asset replacement and renewal: Under spend mainly due to less costs incurred in ring main unit, air break switch and pillar refurbishments than expected.
- The target for system operations and network support included costs to dispose of assets.
   This is now classified as gains / (losses) on asset disposals. The target was also calculated with the understanding of the previous rules i.e. rates were included, but are now separately disclosed etc.

Information relating to revenue and quantities for the disclosure year

- 16. In the box below provide
  - a comparison of the target revenue disclosed before the start of the disclosure year, in accordance with clauses 2.4.1 and 2.4.3(3) to total billed line charge revenue for the disclosure year, as disclosed in Schedule 8; and
  - 16.2 explanatory comment on reasons for any material differences between target revenue and total billed line charge revenue.

#### Box 13: Explanatory comment relating to revenue for the disclosure year

The variance between target revenue and total billed revenue for the year is -1.87%.

- 16.1 Total billed revenue is lower than target revenue due to lower than expected kilowatt hour consumption. The main drivers for this are warmer than average temperatures and the effects of continued energy efficiency improvements by consumers.
- 16.2 The difference between total billed revenue and target revenue is -1.87%. The primary contributing factor to this result are the lower kilowatt hour volumes experienced.

Network Reliability for the Disclosure Year (Schedule 10)

17. In the box below, comment on network reliability for the disclosure year, as disclosed in Schedule 10.

#### Box 14: Commentary on network reliability for the disclosure year

The normalised result for SAIDI was 91.15

The normalised result for SAIFI was 1.37.

The SAIDI outcome was impacted by two key events during the year:

- 1. A storm between the 24th and 25th September 2013 resulted in 11.04 SAIDI minutes. This storm despite being severe did not meet the regulatory criteria for a major event as the time lost it did not exceed the daily limits.
- 2. A further 2.61 minutes were incurred in relation to the cessation of live line work on 16mm copper conductor lines due to safety concerns. The change to planned outages instead of live line work will have on going impacts on SAIDI until the programme of renewal of the 16mm copper conductor is complete in several year times.

#### Insurance cover

- 18. In the box below provide details of any insurance cover for the assets used to provide electricity distribution services, including
  - the EDB's approaches and practices in regard to the insurance of assets used to provide electricity distribution services, including the level of insurance;
  - in respect of any self insurance, the level of reserves, details of how reserves are managed and invested, and details of any reinsurance.

#### **Box 15: Explanation of insurance cover**

WEL Networks Limited does not pay insurance premiums for the electricity distribution network (the overhead lines and underground cables) but does have insurance in place for the electricity substation buildings and associated plant and equipment.

- 18.1: WEL takes prudent insurance cover for the critical 'point' assets within the network (being the substations) but notes insurance for the actual network is either unavailable or prohibitively expensive. WEL also takes prudent insurance cover for the non-network assets and appropriate contracting and statutory liability insurances.
- 18.2: WEL does not have any formal self insurance policies. WEL has risk management practices and procedures. WEL does not have its own 'captive' insurance company or cash reserves invested.

#### SCHEDULE 14A: MANDATORY EXPLANATORY NOTES ON FORECAST INFORMATION

(In this Schedule, clause references are to the Electricity Distribution Information Disclosure Determination 2012)

- 1. This Schedule provides for EDBs to provide explanatory notes to reports prepared in accordance with clause 2.6.5.
- 2. This Schedule is mandatory—EDBs must provide the explanatory comment specified below, in accordance with clause 2.7.2. This information is not part of the audited disclosure information, and so is not subject to the assurance requirements specified in section 2.8.

Commentary on difference between nominal and constant price capital expenditure forecasts (Schedule 11a)

3. In the box below, comment on the difference between nominal and constant price capital expenditure for the disclosure year, as disclosed in Schedule 11a.

## Box 1: Commentary on difference between nominal and constant price capital expenditure forecasts

WEL has adopted the indexation methodology promoted by the Electricity Networks Association (ENA) and developed by its members. The methodology is based on information used in the Orion CPP determination and by Transpower's with an adjustment for labour cost inflation. The resultant indexation used has been further verified against WEL's actual cost experience. The values used for each class of expenditure are shown below.

Network CAPEX cost index = 3.6% p.a.

Non- network maintenance cost index = 1.8% p.a.

Commentary on difference between nominal and constant price operational expenditure forecasts (Schedule 11b)

4. In the box below, comment on the difference between nominal and constant price operational expenditure for the disclosure year, as disclosed in Schedule 11b.

# Box 2: Commentary on difference between nominal and constant price operational expenditure forecasts

Network maintenance (operational) cost index = 3.6% p.a.

Non-network maintenance cost index = 3.5% p.a.

#### **SCHEDULE 15: VOLUNTARY EXPLANATORY NOTES**

(In this Schedule, clause references are to the Electricity Distribution Information Disclosure Determination 2012)

- 1. This Schedule enable EDBs to provide, should they wish to
  - additional explanatory comment to reports prepared in accordance with clauses 2.3.1, 2.4.21, 2.4.22, 2.5.1, 2.5.2, and 2.6.5;
  - information on any substantial changes to information disclosed in relation to a prior disclosure year, as a result of final wash-ups.
- 2. Information in this Schedule is not part of the audited disclosure information, and so is not subject to the assurance requirements specified in section 2.8.
- 3. Provide additional explanatory comment in the box below.

#### Box 1: Voluntary explanatory comment on disclosed information

## S3(ii) Other specified pass-through costs

This includes electricity line services payable to other regulated suppliers for embedded networks. This is similar to indirect transmission charges which are allowed to be treated as recoverable costs under the DPP.

#### S9b.Asset Age Profile:

We have developed a new report to satisfy the information requirements. The information from the report supersedes last year's data as there were some inconsistent interpretations of the requirements in the manual data extraction process last year.

#### S9c.Overhead Lines:

- Circuits in sensitive areas (conservation areas, iwi territory etc) (km) has been reviewed and has consequently been reduced as we have redefined sensitive areas as:
  - Overhead lines from within 1 km of waterways of rivers to 50m of waterways including rivers, lakes and streams. The revised definition was a result of more sophisticated condition base risk management technique employed by WEL.
  - Iwi territory (unchanged)
- "Rugged area" has increased from last year's disclosed information due to peat areas being added.
- Length of circuit within 10km of coastline or geothermal areas (where known) has increased due to inclusion of assets within 10km of east coast (Coromandel)

Overhead circuit requiring vegetation management: Although there are only some parts of the network requiring tree trimming, we have an inspection programme to cover the entire network, since trees can grow up very quickly in the Waikato in areas where previously there were no trees or vegetation.

#### S8(iii)

• Last year did not disclose posted discount under Notional Revenue Forgone but was disclosed as part of the price component revenues separately.
